HYDRAULICS

Lift cylinder has hard chrome plated rods. Pump unit including motor, solenoid, gear pump, and pressure compensated lowering valve are mounted high in the power compartment for ease of service.

ELECTRICAL

24-Volt ZAPI Combi AC inverter, travel con-trol with matching drive motor provide high performance throughout the entire speed range. Travel speed remains constant relative to throttle position regardless of load. Separately fused power control circuits, quick disconnect EPD power cut off, and hour meter / battery discharge indicator combination gauge complete the system. Power configurations and diag-nostic features are displayed with a ZAPI handheld console.

BRAKES

Electromagnetic brake is mounted on the motor armature shaft mul-tiplying the braking power through the transmission. Brake is applied when the control arm is in the vertical or horizontal handle position. Travel speed is reduced when forks are above 12" fork height. Neutral braking resists roll back on ramps.

CONTROLS

Travel, lift, and lower functions are located in the ergonomic operator handle. All operator controls are accessible without having to lift the hand from the handle.

Angle grips are designed to allow easy operation with either hand. Wrap around guard, reversing switch, thumb control, and horn are standard.

Top mounted tiller arm offers excellent operator comfort and minimum steering effort. Gas assisted spring gently returns handle to vertical position.

TRANSMISSION

Vertically mounted drive motor is direct mounted to gear housing. Oil bathed bevel gear drive train with tapered roller bearings transfers power to axle. State of the art optimized gear tech-nology supplies advantages such as zero maintenance, low noise level, high efficiency and high performance.

MAST & PANTOGRAPH

I-beam mast with dual lifting chains. Pantograph stroke extends the fork carriage beyond the units straddle legs, with integral tilt and sideshift.

STRADDLE LEGS & FORKS

Fixed straddle leg inside dimensions (ID) available at 34" or 42" resulting in a 42" or 50" outside dimension (OD)

Class two ITA fork carriage with 36" tall load back rest. 42" Forks are adjustable.

BEARINGS

Drive Wheels: Tapered roller bearings

sealed in oil bath

Load Wheels: Sealed ball bearings

ACCESSIBLITY

Removal of two piece power head cover exposes major components for inspection and maintenance

Aisle Guide

PDSR30 Right Angle Stack Dimensions with 42" ID/50"OD straddles

Load Size	36" Length	40" Length	48" Length
36" Width	79.5"	79.5"	79.5"
40" Width	81.0"	81.0"	81.0"
48" Width	85.3"	85.3"	85.3"

For ease of use add 8" to aisle dimension listed.

For units with 34"ID/42"OD subtract 4" from all values For PDSR30-189 add an additional 3" to all values

Aisle dimensions listed above assume the minimum bay width to be straddle OD plus 5" (2.5" on each either side of straddle leg). Truck performance may vary due to application requirements' and changes in model design.

Overall length increased by up to 3" when control handle is perpendicular to the direction of travel

All measurements show in standard "inch" units
